

## DATA FOR **PROGRESS**

From September 2 to 8, 2025, Data for Progress conducted a survey of 553 likely Democratic primary voters in New York's 10th congressional district using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and geography. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 4$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration.
